Day 1 - How I Beat the Competition with **YOLO...**

...And how you can too with YOLO-NAS!

Welcome Subrat to our ridiculously awesome email newsletter on AI. We've got wild adventures and mind-blowing knowledge on Computer Vision, LLMs & AI in store for you. Check your inbox for our free [Computer Vision Starter Kit](#), and if it's not there, don't panic! Just check your junk folder and whitelist our email.

Now, hold on tight because things are about to get seriously electrifying!

Imagine this: I was fresh out of grad school, bursting with sharp engineering skills. Then, bam! I found myself jobless, replaced faster than a ninja on rollerblades!

I got comfortable, Subrat. I let my skills stagnate like a pond in the desert. It hurt, like a thousand volts of electric shock.

Why did it happen? Simple. They upgraded faster than I could say "AI." In this developer battlefield, if you're not rising, you're rusting away.

But guess what? I bounced back, my friend. Oh, did I bounce back!

I focused full-force on [Computer Vision](#), I faced countless challenges with GitHub Repos, wrestling with complex algorithms and elusive bugs on Stack Overflow.

Doubt crept in, but my stubbornness fueled my determination. With support from online communities, we navigated the AI and Computer Vision journey together.

Piece by piece, the concepts fell into place, and my confidence soared. Then, the incredible happened.

Picture this, Subrat. A potential client was about to go for an alternative AI company. They were hyped up about YOLOv5. I said, "Sure, go for it, but with YOLOv8, you'll get state-of-the-art performance and accuracy!"

This statement alone flicked a switch in their brains and allowed me to secure my first consulting contract, validating my hard work and late nights. From there, opportunities multiplied, bringing in a staggering **\$237K**.

Now, it's your turn, Subrat. Enroll in our **YOLO-NAS course** and fasten your seatbelts because things are about to get exciting!

Here's the kicker: YOLO-NAS starts at just **\$19**, but spots are filling up fast!

Hurry up and enroll

Here: <https://www.augmentedstartups.com/yolonas-yolov8-full-stack-computer-vision-course?cid=8f29f8b6-06ba-437c-afeb-ece38fc97a61>

Before you decide, let's assess your YOLO object detection skills:

1. Can you sketch the YOLO architecture in your sleep?
2. Can you explain Intersection Over Union (IoU) to a teenager?
3. Can you adjust YOLO hyperparameters like a world-class chef tweaking their secret sauce?

4. Can you handle multi-scale predictions in YOLO without breaking a sweat?
5. Can you code a future-proof and deployable YOLO app?

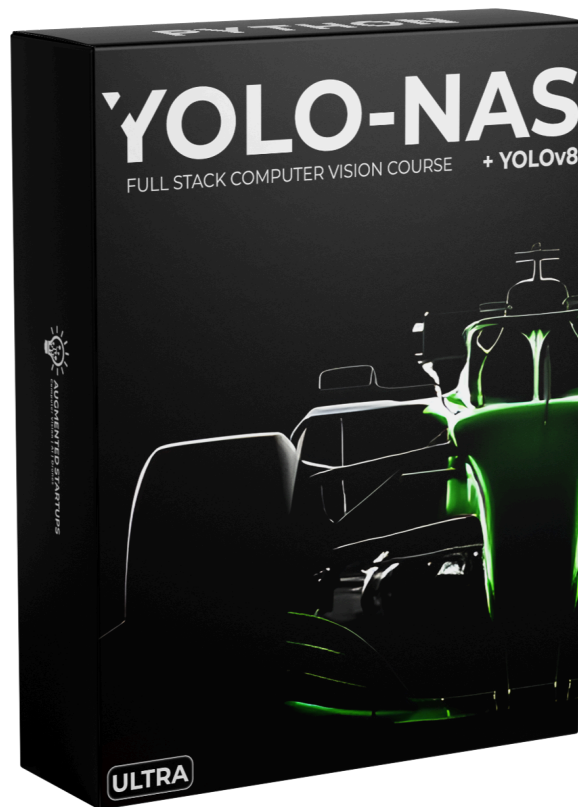

If you stumble, then you have a **skill gap** that needs fixing. In the high-speed AI race, a skill gap is like running a marathon with one shoe. It's time to level up, Subrat.

While you consider this opportunity, remember, your competitors are already sprinting. Don't let them leave you in the dust. With our YOLO-NAS course, you can become the AI Yoda!

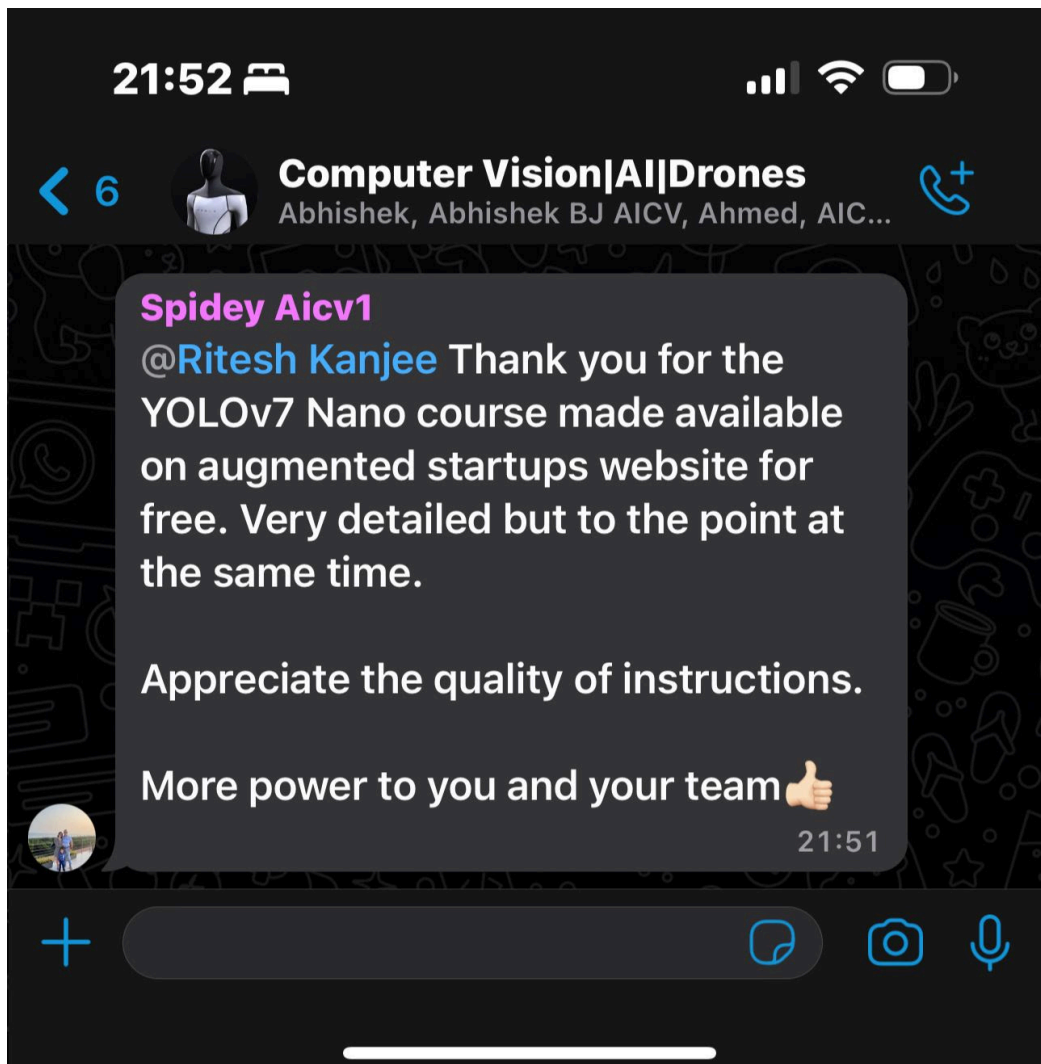

This early bird discount is disappearing faster than a chocolate cake at a birthday party - it'll be gone in less than:

Enroll in YOLO-NAS at 66% OFF

Here's a heartwarming review by one of our students:

This was from one of our students that's in our AI Whatsapp Group which has over 500 AI-CV developers.

Best Regards

Ritz - *Your friendly neighborhood sleep-deprived YOLO enthusiast*

Augmented Startups

P.S. *Remember, AI waits for no one! But with this course, you won't need to wait either.*

P.P.S. *If you don't enroll then don't be surprised if your competition steals your job or client contract.*

We'll see you there!
